(54) Title: QUATERNARY COMPOUNDS COMPRISING PROPOLIS AS THE ACTIVE SUBSTANCE

(57) Abstract: The present invention describes a quaternary composition consisting of propolis delivered in a hydrophilic carrier (cyclodextrin and cyclodextrin derivatives) and co ground with the aid of two compounds for the preparation thereof in the form of a finely divided powder. The composition exhibits advantageous dissolution characteristics in aqueous environments compared to native propolis, hence resulting in greater bioavailability of the active ingredients contained therein.
